Help test a voting system for use in Pennsylvania

If you are a Pennsylvania voter with a perceptual, mobility or dexterity, or cognitive disability, we need your input.

The Pennsylvania Department of State conducts examinations of all voting systems that are used in elections in the state — including all accessibility features.

During the week of December 1, the Department of State will hold an examination of the Hart InterCivic Verity Vanguard 1.0 voting system. The entire examination is open for the public to observe.

We need voters with disabilities to try out the accessibility features of the new system.

Help us learn whether this voting system meets your access needs. You will:

- Mark, verify, and cast a sample ballot with any assistive features you would normally use.
- Provide input about your experience and identify any issues you experienced.
- Suggest ways the system can be set up to be easier for you to use.

We expect the test and your feedback to take 30 - 60

minutes.

When

Wednesday, December 3 from noon until 5pm

Where

Keystone Building-OA Training Room 114A

400 North St, Harrisburg, PA 17120
