play study for minimally-/non-speaking children with autism

- Do you support a minimally-speaking or non-speaking autistic child aged 5–15?
- If the answer is YES, you and your child can participate in our study.
- Help us understand how autistic children with limited speech engage with others during play!

WHAT TO EXPECT

- 2 play activities (~10 min each) with a break in between, in a familiar location (home or school)
- Video recording of interactions

WHAT PARTICIPANTS GET

- A snack for the child
- A chance to reflect on interaction styles

CONTACT INFORMATION

- Le Dinh - lpdinh@colgate.edu
